

## Nothing is impossible

The word impossible always takes place at the beginning of every venture you make out or tend to induce. It occupies the core level and will poke you as if to say, 'I am here to have got you tight'. The word soon becomes a speed breaker or dream buster for many, but certainly not for those who simply violate it up into 'I m possible'. To counter its effect and strength you all need to have a dream.

If you have a dream than even before you begin your journey you are more likely to take the winner tag along with you. The one we all feel proud to be, have and do. If you look down the lane of history, you will find that once the thing which seemed to be a miracle became a reality because of those legends

who had a dream to fulfil. And it's their dream that made great discoveries and inventions for the better tomorrow to humanity.

Nothing is inconceivable if you dare to do and make yourselves ready to face and master all challenges that might sneak out as you put out your life's journey. Every person here on this planet possess the capacity and power to make miracles. The only affair that might have broken them and or stopping them is the desire to achieve and make out the things which might have looked impossible but in fact it's not.

The saddest part to witness is when people pass on their baton generation after generation with a message written along it 'You have a limit'. This in fact paralyzes their entire dynasty and make them feeble and weak may not be physically, but mentally and spiritually – the powerhouse of every human. You need or have to pass on the baton, simply note it with 'You are the best thing ever happened in my life and you are a winner'. Passing on the baton with confidence and faith wrapped with positivity will always yield better results. If someone has passed on their baton to you then watch out for the tag before you accept and move forward to pass it on. Baton with negative message will never make you win your race. So, be very careful.
